

Downloading or Uploading data from the LISTdata Server

January 2018

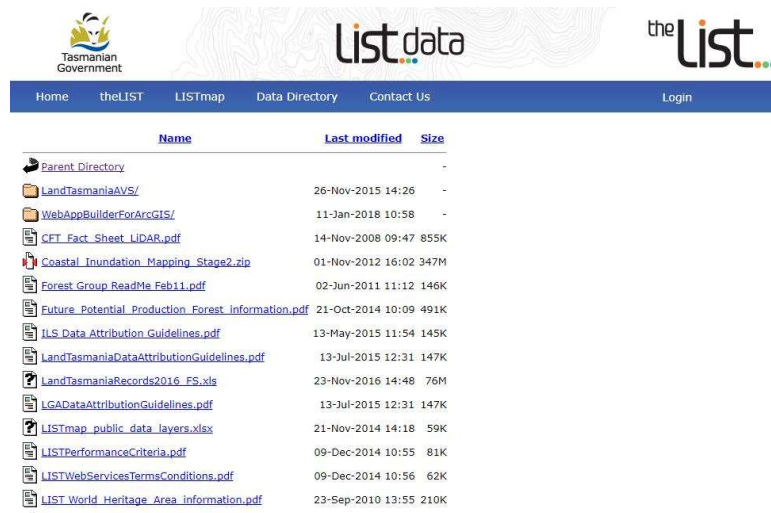

LIST data sets can be downloaded from the LISTdata server by following these instructions:

1. Enter the following URL in the address bar of your web browser: <https://listdata.thelist.tas.gov.au>

Click Login

2. Enter your assigned login and password (contact Client Services to get set up). A directory of files will appear.

3. Select a zip file then follow the prompts to save it to a location on your PC or server. Repeat for each file required.

Data can be uploaded to the LISTdata server by following steps 1 and 2 then:

Note: For security and speed of transfer, we recommend data is compressed into a zip file before copying onto the server. Please avoid copying directory structures onto the server.

4. Click UPLOAD FILE

5. Click Browse and locate your data.

6. Click Upload

An automatic email will be sent to Client Services to notify us that new data has been uploaded.
