

Water Management Regions

Dataset

December 2005

Water Management Regions

The [Water Management Act 1999](#) is part of the State's integrated Resource Management and Planning System and provides for the management of Tasmania's freshwater resources.

The Water Management Regions dataset contains the 48 Water Catchments that the 8 Water Management Regions are divided into. Water Management Regions support the administration of the [Water Management Act 1999](#) Catchments are attributed with their catchment name and number and region number.

The boundaries of the regions and catchments generally follow watersheds, which have been derived from topographic data sources.

The boundaries of the Water Management Regions are portrayed on *Water Management Regulations 2000 Index Plan*; CPR 5278. This index plan provides a reference to a separate detail plan registered in the Central Plan Register for each Water Management Region.

Water Management Regions - Data Structure

This dataset is available in a number of formats to suit most GIS / Desktop Mapping platforms. Datum is GDA94. The following attributes are supplied:

Field	Type	Description
ID	INT32	Cadastral Identifier Number
PROC_PLAN	CHAR(8)	The CPR Plan Number for the Water Management Region
REGION_NO	INT32	The Water Management Region Number
INDEX_PLAN	CHAR(7)	The CPR Plan Number for the Water Management Regulations 2000 Index Plan
CATCH_NO	INT32	The Water Management Catchment Number
CATCH_NAME	CHAR(40)	The Water Management Catchment Name
