

Slope Map

Fact Sheet

Data Description

The LIST Slope Map layer is a state-wide image derived from digital elevation data and represents the steepness of the terrain, symbolising slope values above 25 degrees.

Data Compilation

The Slope Map layer was created from 1 metre resolution digital elevation models (DEMs) derived from LiDAR data, supplemented with a 10 metre state-wide DEM produced by Mineral Resources Tasmania for areas without LiDAR coverage.

See LiDAR Index for LiDAR coverage.

Positional Accuracy

The Slope layer is compiled from a number of elevation data sources and as such, accuracy varies according to source. Refer to LiDAR indexes for individual LiDAR project specifications.

Attribute Accuracy

Not Applicable.

Logical Consistency

Not Applicable.

Completeness

The Slope Map is complete for all of Tasmania excluding Macquarie Island, and is updated as new data is procured.

Revision Date

03/07/2026
