

Marine Leases

Dataset

February 2008

Marine Leases

The Marine Leases data set holds spatial areas of land registered as a Marine Farm lease from the Crown within the State of Tasmania. Marine Farm Leases are issued under the Marine Farming Planning Act 1995 for a period of 30 years. The lease describes the area in which marine farming activities are permitted to take place in accordance with the Act.

The lease boundary is described on a survey plan registered in the Central Plan Register, as determined by the Minister and added as an attachment to the lease document.

The LIST Marine Farm Leases data set is maintained by the Information and Land Services Division of DPIW and contains spatial representation of all lease areas within Tasmania which are attributed with a Marine Farm Lease Number.

The Marine Farming Branch of the Food, Agriculture and Fisheries Division of DPIW maintain Marine Farm Lease details, which are recorded against the Marine Farm Lease Number. LIST Marine Leases are a layer of the LIST Cadastral Area.

Marine Leases are a layer of the LIST Cadastral Area.

Marine Leases - Data Structure

This dataset is available in a number of formats to suit most GIS / Desktop Mapping platforms. Datum is GDA94. The following attributes are normally supplied although further attributes are available and may be supplied upon request:

Field	Type	Description
CID	INT32	Cadastral Persistent Identifier – The unique database identifier for each cadastral polygon
M_LEASE_NO	CHAR(30)	The identifier from an external dataset being the Lease Number for a Marine Lease
PLAN_REF	CHAR(8)	A plan registration reference issued by a Plan Authority
COMP_AREA	DECIMAL(16,3)	The computed area of the region in square metres
MEAS_AREA	DECIMAL(16,3)	The area recorded in the plan that depicts the region in square metres
UFI	CHAR(12)	Unique Feature Identifier – a unique identifier attached to every representation of a feature instance within The LIST
FMP	CHAR(12)	Feature Metadata Pointer – a code relating to information on lineage and accuracy of each feature
CREATED_ON	CHAR(12)	Date which the region was created in the CadArea table. Format YYYY-MM-DD HH:MM:SS

GSB Use only - Extraction parameters

Retired_on: null

Status: 0

Cad_types: 6,5
